

Pet Product Services

Intertek

Valued Quality. Delivered.

Pets are more than cozy companions; they are often viewed by pet owners as members of the family. With a focus on providing healthy and happy lifestyles for their pets, consumers continue to drive demand for high quality pet products that are safe to use with their animals.

In order to gain consumer trust, manufacturers and retailers must demonstrate their due-diligence by reducing potential hazards associated with their products through quality and safety testing.

Intertek provides technical expertise and industry insight to help our customers build quality and safety into their business and maintain a competitive advantage within the pet product industry.

Our Pet Product Services include:

- Regulatory Testing
- Safety Assessment
- Pet Food Nutrients & Additive Analysis

Pet Product Services

Intertek offers a full range of testing capabilities to integrate safety and quality into a wide range of pet products, including:

- Sharp Points / Edges
- Usability

Adding Value to Your Brand with Intertek Tick Mark

Intertek's Tick Mark is designed to help manufacturers and retailers differentiate their pet products in the global marketplace while instilling confidence in the consumer that the products they purchase are safe for use. The Intertek Tick Mark signifies that the product has been verified by an independent third party testing facility and is applicable to national and international standards
